

Implementation Consultant Information

Implementation Consultants (ICs) help healthcare providers and community organizations across the state understand and use the GLHC suite of applications and solutions. ICs assist individuals and groups by:

- Presenting applications and explaining their functionality
- Exploring and discussing common challenges and workflow issues
- Guiding the practice/organization through the start-up and set-up process
- Training staff as needed
- Fostering fruitful relationships with decision makers across the care-continuum
- Assisting the community in becoming a care-connected community
