

## Introduction to GLHC Patient Care Documents

Great Lakes Health Connect (GLHC) is Michigan’s largest Health Information Exchange (HIE). GLHC provides a wide-range of services and products, creating care connected communities across the state.

One product is a community health record (VIPR) with over 7 million unique patient records available to any participating organization/provider. By using the Patient Care Document Submission website, professionals can submit 1) Advance Care Documents 2) Care Plans, 3) Action Plans, and 4) other clinical PDF documents into VIPR. This provides up-to-date clinical information to participating providers throughout Michigan and allows the documents to sit alongside other pertinent clinical documents.
