October 30, 2019

Creating Care Connected Communities

11/1/2019 | 3

District Health Dept. #10

- Stopping the spread of communicable diseases
- “Before we started using VIPR we sometimes waited weeks before we had the necessary information and sometimes we just did not get it.”
- “We recently got a case reported of Hepatitis A on a Sunday and by looking the patient up in VIPR we were able to determine that it was a confirmed case. The person was incarcerated and we were able to get into the jail and vaccinate that day to help prevent that one case from turning into an outbreak.”

Virtual Update Meeting

Creating Care Connected Communities

11/1/2019 | 4

Munson Healthcare Endocrinology and Metabolism Department

- Using VIPR to prepare charts and retrieve patient’s laboratory results
- “VIPR is the most helpful, easy, and handy tool around. No more sitting on the phone or waiting for a fax, it is an essential tool for our department.”

Creating Care Connected Communities

What's brewing?

11/1/2019 | 12

- Completed migration
- New Solutions in 2020
 - Customer customizations
 - De-duplicated + Easy Access to ADT
 - Workflow + Patient Care Improvements
 - Referral Demographics
 - Patient Sensor
- Enhancements – more to come on this

Virtual Update Meeting
October 30, 2019

Creating Care Connected Communities

Solution Enhancements

What's coming? When?

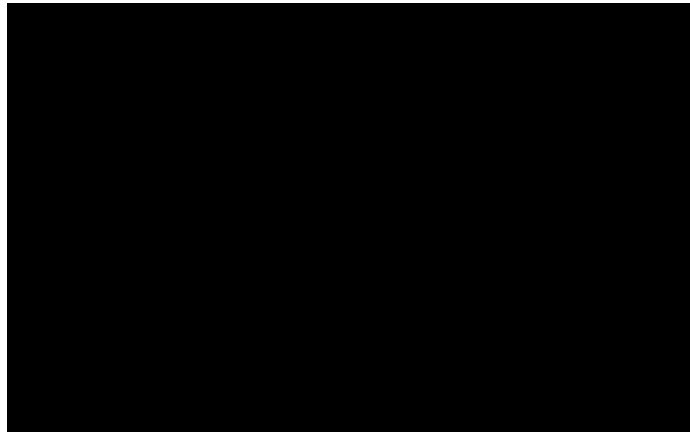

- Solution Center – VIPR
 - More sources
 - User management for VIPR Administrators
 - Advanced normalization
- Solution Center – Inbox
 - Death indicator
 - Batch print PDFs
- Bridge Referral Application
 - Begin a referral from an EMR
- New suggestion?

Creating Care Connected Communities

Enhancing Patient Driven Payment Model (PDPM)

11/1/2019 | 18

- "In July 2018, CMS finalized a new case-mix classification model, the Patient Driven Payment Model (PDPM), that, effective beginning October 1, 2019, will be used under the Skilled Nursing Facility (SNF) Prospective Payment System (PPS) for classifying SNF patients in a covered Part A stay."
 - www.cms.gov/medicare/medicare-fee-for-service-payment/snfpps/pdpm.html
- GLHC can enhance PDPM for SNF's:
 - Build ICD 10 coding capacity to ensure payment
 - Capture Clinical Documentation more timely and accurately
 - Ability to quickly capture admission information
 - Use clinical record to develop a baseline care plan within 48 hours of admission

Michigan Medicine Cancer Registry team

Amy Salter, RHIT, CTR
Michigan Medicine, Cancer Registry Quality Coordinator

“Having access to this health information exchange has tremendously improved how we are able to complete our follow-up and abstracting functions in an accurate and timely manner.

- **Follow-up:** We follow our patients for life, GLHC is another avenue that we use to find out how long patients are living after a cancer diagnosis and their disease status.
- **Abstracting:** The Cancer Registry is able to produce an accurate and complete abstraction of the patient’s cancer information which is used by the National Cancer Database, the State of Michigan and the Michigan Medicine medical community.

“We are hoping more facilities and physician offices will share their health information with GLHC in the future. Having access to review health information will assist Cancer Registries in the fight against cancer!”
